

Speech Therapy – What to Expect

What is Speech and Language Therapy?

Speech and language therapy is designed to treat speech, language, cognitive-communication and swallowing disorders in individuals from infants to the elderly.

Who Can Provide Speech and Language Therapy?

A speech language pathologist (SLP) can evaluate, diagnose and treat speech, language, cognitive-communication and swallowing disorders.

Who Can Benefit from Speech and Language Therapy?

Those who may benefit from speech-language therapy include individuals with:

- Autism
- Phonological disorders
- Articulation disorders
- Motor-speech disorders (i.e. apraxia and dysarthria)
- A variety of neurological disorders (i.e. cerebral palsy)
- Cognitive deficits
- Voice disorders
- Fluency disorders
- Auditory processing disorder
- Learning disabilities
- Hearing impairments
- A variety of additional communicative needs

What are the Length and Duration of Services?

Initial evaluations for speech therapy are one hour. Speech treatment sessions vary in length. The duration of therapy can last weeks to years depending on the severity of the disorder.

The Mandala Difference:

Mandala Family Wellness offers evidence-based and highly trained speech and language therapy. Our therapists maintain a Florida state license and ASHA certification. Due to our commitment to expanding our therapy knowledge and techniques, we are able to offer specialized services that are not found together in other clinics in and surrounding the Jacksonville area.
